Please fill out the following application (attach extra paper if necessary). This does not need to be formal, but we ask you to consider the questions carefully. By answering the questions, we will be able to see if you and WolfTree are a good match.

1) What experience and/ or interest inspired you to pursue an internship with WolfTree?

2) What professional and/or personal skills would you hope to gain/improve from this internship?

3) After reading the job description, what do you see yourself contributing to WolfTree's programs?

4) Wolfree is a science education organization whose goal is to give students the tools to think critically and make their own informed decisions. How would you respond to a student who asks if our rivers are polluted because we cut down trees?

5) What are your professional goals and/or future plans? (If you are a student, please let us know what degree you are working towards and when you plan to graduate.)

6) How much time would you be able and willing to commit to Wolfree? In the space below, show how Wolfree fits into your weekly schedule. (Keep in mind field days generally run from 7am to 4pm. Special project times vary, but often revolve around the typical business day: 9am-5pm.)

Please list three references from previous experience working with children, in the sciences, or outdoors.
